

## Smad2/3 (N175) polyclonal antibody

Catalog: AP0445

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

Smad proteins, the mammalian homologs of the Drosophila mothers against decapentaplegic (Mad), have been implicated as downstream effectors of  $\text{GF}\beta$ /BMP signaling. Smad1 (also designated Madr1 or JV4-1) and Smad5 are effectors of BMP-2 and BMP-4 function, while Smad2 (also designated Madr2 or JV18-1) and Smad3 are involved in  $\text{TGF}\beta$  and activin-mediated growth modulation. Smad4 (also designated DPC4) has been shown to mediate all of the above activities through interaction with various Smad family members. Smad6 and Smad7 regulate the response to activin/ $\text{TGF}\beta$  signaling by interfering with  $\text{TGF}\beta$ -mediated phosphorylation of other Smad proteins.
