

## Mouse Anti-Human Ig lambda chain

| Catalog: BS21049 Host: Mouse                             |   |
|--|---|
|  |   |
| Description:   | - 1/1000)   |
| Mouse Monoclonal Secondary Antibody to Human Ig          | Storage&Stability:  |
| lambda chain   | Shipped at 4 °C. Upon delivery aliquot and store at -20 °C  |
| Product:   | for one year. Avoid freeze/thaw cycles.                     |
| 1 mg/ml, liquid in 0.01M Phosphate Buffered Saline,      | Specificity:  |
| pH7.2, 0.05% Sodium Azide                                | By immunoelectrophoresis and ELISA this antibody re-        |
| Preservative:  | acts specifically with Human Ig lambda chain. No anti-      |
| 0.02% Proclin/Sodium Azide                               | body was detected against non immunoglobulin serum          |
| Classification:  | proteins.   |
| Secondary Antibodies                                     | Expiration Date:  |
| Purification&Purity:                                     |   |
| The antibody was isolated from ascitic by immunoaffinity | Six months from date of reconstitution.                     |
| chromatography using antigens coupled to agarose beads.  | Note:   |
| Applications:  | For research use only, not for use in diagnostic procedure. |
| E (1/5000 - 1/20000), WB (1/5000 - 1/20000), IH (1/500   |   |
