

HBO1 (S167) polyclonal antibody

Catalog: BS2248

Host: Rabbit

Reactivity: Human, Mouse, Rat

Background:

KAT7 / Hbo1 is a member of the MYST histone acetyltransferase family which acetylates both histone H3 and H4 and is involved in the regulation of replication. The initiation of DNA replication is tightly regulated in eukaryotic cells to ensure that the genome is precisely duplicated once per cell cycle. This is accomplished by controlling the pre-replicative complex. KAT7 acts as a positive regulatory factor for pre-RC assembly and thus controls DNA replication.
