Bioworld Technology,Inc.

PKR (R445) polyclonal antibody

Catalog: BS3652 Host: Rabbit Reactivity: Human

BackGround:

An interferon-inducible, RNA-dependent protein serine/threonine kinase (PKR) has been described. PKR in earlier literature is variously known as DAI, dsJ, PI kinase, p65, p67 or TIK for the mouse kinase; and p68 or p69 for the human kinase. The PKR kinase substrate is the α subunit of protein synthesis initiation factor eIF-2. Phosphorylation of eIF-2 α on serine-51 results in inhibition of translation. Molecular cDNA clones have been isolated from both human and mouse cells. The serine/threonine kinase catalytic domains map to the carboxy terminal half of the protein while the RNA-binding domains are located in the amino terminal region. Three kinds of regulation of PKR enzymatic activity have been described.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

Predicted band size : 62 kDa Observed band size : 68 kDa

Swiss-Prot:

P19525

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000 IHC: 1:50~1:200

Storage&Stability:

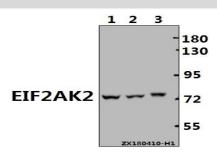

Store at 4 ℃ short term. Aliquot and store at -20 ℃ long

term. Avoid freeze-thaw cycles.

Specificity:

PKR (R445) polyclonal antibody detects endogenous levels of PKR protein.

DATA:

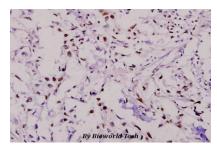

Western blot (WB) analysis of PKR pAb at 1:500 dilution

Lane1:SGC7901 whole cell lysate(40ug)

Lane2:A375 whole cell lysate(40ug)

Lane3:HCC827 whole cell lysate(40ug)

Immunohistochemistry (IHC) analyzes of PKR (R445) pAb in paraffin-embedded human breast carcinoma tissue at 1:50.

Note:

For research use only, not for use in diagnostic procedure.
