

GM130 Rabbit monoclonal antibody

Catalog: BS40058

Host: Rabbit

Reactivity: Human Mouse Rat Monkey Cow
Dog

BackGround:

Golgi auto-antigen; probably involved in maintaining cis-Golgi structure. The Golgi apparatus, which participates in glycosylation and transport of proteins and lipids in the secretory pathway, consists of a series of stacked cisternae (flattened membrane sacs). Interactions between the Golgi and microtubules are thought to be important for the reorganization of the Golgi after it fragments during mitosis. This gene encodes one of the golgins, a family of proteins localized to the Golgi.
