

Histone H3 (mono methyl R17) Rabbit monoclonal antibody

Catalog: BS40083

Host: Rabbit

Reactivity: Human Mouse Rat

BackGround:

H3 Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling. The nucleosome is a histone octamer containing two molecules each of H2A, H2B, H3 and H4 assembled in one H3-H4 heterotetramer and two H2A-H2B heterodimers.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2.

Molecular Weight:

15kDa

Swiss-Prot:

P68431

Purification&Purity:

Affinity-chromatography

Applications:

WB 1:100~1:2000 IHC 1:100~1:250 ICC/IF 1:100~1:250

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Histone H3 (mono methyl R17) Antibody detects endogenous levels of total Histone H3 (mono methyl R17)

DATA:

Western blot analysis of Histone H3 (mono methyl R17) expression in HeLa cell lysate.

Immunohistochemical analysis of paraffin-embedded mouse colon, using Histone H3 (mono methyl R17) Antibody.

Note:

For research use only, not for use in diagnostic procedure.
