

Phospho-PDGF Receptor beta (Y740) Rabbit monoclonal antibody

Catalog: BS40212

Host: Rabbit

Reactivity: Mouse Rat

BackGround:

This gene encodes a cell surface tyrosine kinase receptor for members of the platelet-derived growth factor family. These growth factors are mitogens for cells of mesenchymal origin. The identity of the growth factor bound to a receptor monomer determines whether the functional receptor is a homodimer or a heterodimer, composed of both platelet-derived growth factor receptor alpha and beta polypeptides.
