

Mast Cell Tryptase Rabbit monoclonal antibody

Catalog: BS40239

Host: Rabbit

Reactivity: Human Mouse Rat

BackGround:

Tryptases comprise a family of trypsin-like serine proteases, the peptidase family S1. Tryptases are enzymatically active only as heparin-stabilized tetramers, and they are resistant to all known endogenous proteinase inhibitors. Several tryptase genes are clustered on chromosome 16p13.3. These genes are characterized by several distinct features.
