

Phospho-beta Catenin (S33/S37) Rabbit monoclonal antibody

Catalog: BS40364

Host: Rabbit

Reactivity: Human Rat

BackGround:

Beta-catenin is an adherens junction protein. Adherens junctions (AJs; also called the zonula adherens) are critical for the establishment and maintenance of epithelial layers, such as those lining organ surfaces. AJs mediate adhesion between cells, communicate a signal that neighboring cells are present, and anchor the actin cytoskeleton. In serving these roles, AJs regulate normal cell growth and behavior.
