

## Phospho-Presenilin 1 (Ser310) Recombinant Rabbit mAb

Catalog: BS43088

Host: Rabbit

Reactivity: Human

### BackGround:

Alzheimer's disease (AD) patients with an inherited form of the disease carry mutations in the presenilin proteins (PSEN1; PSEN2) or in the amyloid precursor protein (APP). These disease-linked mutations result in increased production of the longer form of amyloid-beta (main component of amyloid deposits found in AD brains). Presenilins are postulated to regulate APP processing through their effects on gamma-secretase, an enzyme that cleaves APP. Also, it is thought that the presenilins are involved in the cleavage of the Notch receptor, such that they either directly regulate gamma-secretase activity or themselves are protease enzymes. Several alternatively spliced transcript variants encoding different isoforms have been identified for this gene, the full-length nature of only some have been determined. [provided by RefSeq, Aug 2008]

### Product:

Store at -20 °C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.

### Molecular Weight:

22 kDa

### Swiss-Prot:

P49768

### Purification&Purity:

Affinity Purification

### Applications:

WB: 1:2000&lt;br /&gt;ICC/IF: 1:50

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

IgG

### DATA:

Western blot detection of Phospho-Presenilin 1/PS-1 (Ser310) in Jurkat, Hela cell lysates using Phospho-Presenilin 1/PS-1 (Ser310) antibody(1:1000 diluted).

### Note:

For research use only, not for use in diagnostic procedure.
