Phospho-PKC delta (Ser299) Recombinant Rabbit mAb

Catalog: BS43122 Host: Rabbit Reactivity: Human, Mouse

BackGround:

The protein encoded by this gene is a member of the protein kinase C family of serine- and threonine-specific protein kinases. The encoded protein is activated by diacylglycerol and is both a tumor suppressor and a positive regulator of cell cycle progression. Also, this protein can positively or negatively regulate apoptosis. Defects in this gene are a cause of autoimmune lymphoproliferative syndrome. [provided by RefSeq, Aug 2017]
