

BID p11 polyclonal antibody

Catalog: BS62557

Host: Rabbit

Reactivity: Human

BackGround:

Bid is a pro-apoptotic “BH3 domain-only” member of the Bcl-2 family originally discovered to interact with both the anti-apoptotic family member Bcl-2 and the pro-apoptotic protein Bax. Bid is normally localized in the cytosolic fraction of cells as an inactive precursor and is cleaved at Asp60 by caspase-8 during Fas signaling, leading to translocation of the carboxyl terminal p15 fragment (tBid) to the mitochondrial outer membrane. Translocation of Bid is associated with release of cytochrome c from the mitochondria, leading to complex formation with Apaf-1 and caspase-9 and resulting in caspase-9 activation. Thus, Bid relays an apoptotic signal from the cell surface to the mitochondria triggering caspase activation.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 21 kDa

Swiss-Prot:

P55957

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB:1:500~1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

BID p11 polyclonal antibody detects endogenous levels of BID p11 protein.

DATA:

Western blot (WB) analysis of BID p11 polyclonal antibody at 1:500 dilution

LaneA:OPM2 whole cell lysate

LaneB:OPM2 treated with DRB(50μM) for 2 hours whole cell lysate

LaneC:OPM2 treated with DRB(50μM) for 4 hours whole cell lysate

LaneD:OPM2 treated with DRB(50μM) for 6 hours whole cell lysate

Note:

For research use only, not for use in diagnostic procedure.
