

## HA-tag polyclonal antibody

Catalog: BS67269

Host: Rabbit

Reactivity: N/A

**BackGround:**

Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins.

**Product:**

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

**Molecular Weight:**

N/A

**Swiss-Prot:**

N/A

**Purification&Purity:**

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

**Applications:**

WB (1/1000 - 1/2000), IP (1/10 - 1/100)

**Storage&Stability:**

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

**Specificity:**

Recognizes the HA-tag fused to the amino- or carboxy-termini of targeted proteins in transfected or transformed cells.

**DATA:**

Western blot analysis of Anti-HA-tag Antibody against HEK293T cells transfected with vector overexpressing HA tag (A) and untransfected (B).

**Note:**

For research use only, not for use in diagnostic procedure.
