

Cleaved-Notch 1 (V1754) polyclonal antibody

Catalog: BS7018

Host: Rabbit

Reactivity: Human, Mouse, Rat

Background:

Notch1 is a transmembrane protein functioning in development and the determination of cell fate. During maturation, the notch molecule is cleaved by a furin-like convertase at its extracellular domain. Upon binding to a ligand such as Delta1, or upon extracellular calcium depletion, the carboxy-terminal notch1 fragment is released and further cleaved between Gly1753 and Val1754. The resulting activated cytosolic fragment translocates to the nucleus where it activates transcription.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 110 kDa

Swiss-Prot:

P46531

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

IHC: 1:50~1:200

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Cleaved-Notch 1 (V1754) polyclonal antibody detects endogenous levels of the Notch1 intracellular domain (NICD). The antibody does not recognize full-length Notch1.

DATA:

Immunohistochemistry (IHC) analyzes of Cleaved-Notch 1 (V1754) pAb in paraffin-embedded human brain tissue.

Note:

For research use only, not for use in diagnostic procedure.
