

## TNNI2 polyclonal antibody

Catalog: BS71003

Host: Rabbit

Reactivity: Human

### BackGround:

This gene encodes a fast-twitch skeletal muscle protein, a member of the troponin I gene family, and a component of the troponin complex including troponin T, troponin C and troponin I subunits. The troponin complex, along with tropomyosin, is responsible for the calcium-dependent regulation of striated muscle contraction. Mouse studies show that this component is also present in vascular smooth muscle and may play a role in regulation of smooth muscle function. In addition to muscle tissues, this protein is found in corneal epithelium, cartilage where it is an inhibitor of angiogenesis to inhibit tumor growth and metastasis, and mammary gland where it functions as a co-activator of estrogen receptor-related receptor alpha. This protein also suppresses tumor growth in human ovarian carcinoma. Mutations in this gene cause myopathy and distal arthrogyriposis type 2B. Alternatively spliced transcript variants have been found for this gene.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 21 kDa

### Swiss-Prot:

P48788

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific im-

munogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB 1:500 - 1:1000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

TNNI2 polyclonal antibody detects endogenous levels of TNNI2 protein.

### DATA:

Western blot (WB) analysis of TNNI2 polyclonal antibody at 1:500 dilution

LaneA:The skeletal muscle tissue lysate of Mouse(40ug)

LaneB:The skeletal muscle tissue lysate of Rat(40ug)

### Note:

For research use only, not for use in diagnostic procedure.
