

Acetyl-Lysine Pan polyclonal antibody

Catalog: BS74032

Host: Rabbit

Reactivity: ALL

BackGround:

Acetyllysine (or acetylated lysine) is an acetyl-derivative of the amino acid lysine. There are multiple forms of acetyllysine - this article refers to N- ϵ -acetyl-L-lysine. The other form is N- α -acetyl-L-lysine. In proteins, the acetylation of lysine residues is an important mechanism of epigenetics. It functions by regulating the binding of histones to DNA in nucleosomes and thereby controlling the expression of genes on that DNA. Non-histone proteins are acetylated as well. Unlike the functionally similar methyllysine, acetyllysine does not carry a positive charge on its side chain.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

Refer to Figures

Swiss-Prot:

N/A

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB 1:500 - 1:2000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Acetyl-Lysine Pan polyclonal antibody detects endogenous levels of Acetyl-Lysine Pan protein.

DATA:

Western blot analysis of extracts of HeLa cells, using Pan Acetyl-Lysine antibody.

Note:

For research use only, not for use in diagnostic procedure.
