

## Raptor polyclonal antibody

Catalog: BS91154

Host: Rabbit

Reactivity: Human, Mouse, Rat

**BackGround:**

Regulatory associated protein of FRAP, also designated Raptor, is a binding partner for mammalian target of rapamycin kinase (FRAP), and is essential for FRAP signalling in vivo. Raptor binding to FRAP is critical for FRAP-catalysed substrate phosphorylation of 4E-BP1. The raptor-FRAP complex is nutrient-sensitive and is important for a mechanism by which cells coordinate cell growth and size with changing environmental conditions. Raptor serves as a negative regulator of FRAP kinase activity under nutrient-deprived conditions and is an important component in the FRAP pathway. Raptor is highly expressed in skeletal muscle and to a lesser extent in brain, kidney, lung and placenta.

**Product:**

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

**Molecular Weight:**

131 kDa

**Swiss-Prot:**

Q8N122(Human) Q8K4Q0(Mouse)

**Purification&Purity:**

Peptide affinity purified.

**Applications:**

WB:1:500

ICC:1:50-1:200

IHC:1:50-1:200

FC:1:50-1:100

**Storage&Stability:**

Store at +4 °C after thawing. Aliquot store at -20 °C. Avoid

repeated freeze / thaw cycles.

**Specificity:**

Raptor polyclonal antibody detects endogenous levels of Raptor protein.

**DATA:**

Western blot analysis of Raptor on MCF-7 cell lysate using anti-Raptor antibody at 1/500 dilution.

ICC staining Raptor in 293T cells (green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton X100/PBS.

**Note:**

For research use only, not for use in diagnostic procedure.
