

PPAR- γ (C-terminus) monoclonal antibody

Catalog: MB0080

Host: Mouse

Reactivity: Human

BackGround:

PPAR gamma is implicated in numerous diseases including obesity, diabetes, atherosclerosis and cancer. PPAR gamma activators include prostanoids, fatty acids, thiazolidinediones and N-(2-benzoylphenyl) tyrosine analogues. A key component in adipocyte differentiation and fat-specific gene expression, PPAR gamma may modulate macrophage functions such as proinflammatory activities, and stimulate oxidized low-density lipoprotein (x-LDL) uptake. A Pro12Ala polymorphism of the PPAR gamma2 gene has been reported to reduce transactivation activity in vitro. This substitution may affect the immune response to ox-LDL and be associated with type 2 diabetes. In addition, the Pro12Ala variant of the PPAR gamma2 gene maybe correlated with abdominal obesity in type 2 diabetes.

Product:

1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~53/57kDa

Swiss-Prot:

P37231

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

This antibody detects endogenous levels of PPAR gamma (C-terminus) and does not cross-react with related proteins

DATA:

Western blot detection of PPAR γ fragment in CHO-K1 cell lysate (A) and CHO-K1 transfected by pEGFP-C1-PPAR γ (B) cell lysate using PPAR γ mouse mAb (1:500 diluted). Predicted band size: 53kDa. Observed band size: 53kDa.

Note:

For research use only, not for use in diagnostic procedure.
