Bioworld Technology, Inc.

Recombinant DHH, Mouse

Catalog Number: BK0022-50µg

Source: Escherichia coli.

Quantity: 50µg

Description:

Desert hedgehog protein (DHH) is a member of the Hedgehog family which encodes signaling molecules that play an important role in regulating morphogenesis. It is predicted to be made as a precursor that is auto-catalytically cleaved; the N-terminal portion is soluble and contains the signaling activity while the C-terminal portion is involved in precursor processing. More importantly, the C-terminal product covalently attaches a cholesterol moiety to the N-terminal product, restricting the N-terminal product to the cell surface and preventing it from freely diffusing throughout the organism. Defects in this protein have been associated with partial gonadal dysgenesis (PGD) accompanied by minifascicular polyneuropathy. DHH may be involved in both male gonadal differentiation and perineurial development. DHH binds both Patched and Patched 2 as well as Hedgehog interacting protein (Hip). It induces steroidogenic factor 1 (SF1), which is instrumental in promoting Leydig cell differentiation. It also promotes the deposition of basal lamina surrounding seminiferous tubules. Recombinant mouse Desert Hedgehog (DHH) produced in E.coli is a single non-glycosylated polypeptide chain containing 176 amino acids. A fully biologically active molecule, rmDHH has a molecular mass of 20.1 kDa analyzed by reducing SDS-PAGE and is obtained by chromatographic techniques at GenScript.

Molecular Weight:

20.1 kDa, observed by reducing SDS-PAGE.

Purity:

> 98% as analyzed by SDS-PAGE and HPLC.

Biological Activity:

ED50 <20 µg/ml, measured by its ability to induce alkaline phosphatase production by CCL-226 cells.

Physical Appearance:

Sterile Filtered White lyophilized (freeze-dried) powder.

Formulation:

Lyophilized after extensive dialysis against PBS.

AA Sequence:

IIGPGRGPVGRRRRYVRKQLVPLLYKQFVPSMPER-
MPER-
TLGASGPAEGRVTRGSRFRDLVPNYNPDIIFK-
DEENSGADRLMTERCKERV-
NALAIAVMNMWPGVRLRVTEGWD-
EDGHHAQDSLHYEGRALDITTSRDRNKY-
GLLARLAVEAGFDWVYYESRNHIHVSV-
KADNSLAVRAGG

Endotoxin:

< 0.2 EU/µg, determined by LAL method.

Reconstitution:

Reconstituted in ddH₂O or PBS at 100 µg/ml.

Storage:

Lyophilized recombinant Mouse Desert Hedgehog (DHH) remains stable up to 6 months at -80 °C from date of receipt. Upon reconstitution, Mouse Desert Hedgehog (DHH) should be stable up to 1 week at 4 °C or up to 2 months at -20 °C.

Usage:

This material is offered by USA Bioworld biotech for research, laboratory or further evaluation purposes. For research use only.
