

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

Brn-3a (N349) Peptide

Cat No.: BS2738P

Background

Three Brn-3 proteins have been described and are designated Brn-3a, Brn-3b and Brn-3c. Brn-3a has two functional transactivating domains, one at the amino terminus and one at the carboxy terminus. While Brn-3a and Brn-3c stimulate transcription, Brn-3b generally functions as a transcriptional repressor. However, Brn-3b, but not Brn-3a, has been shown to regulate the expression of the acetylcholine receptor.

Swiss-Prot

Q01851

Applications

Blocking

Specificity

This peptide can be used with studies using BS2738 Brn-3a (N349) pAb.

Purification & Purity

Synthetic peptide Brn-3a (N349). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
