

p16 ARC Recombinant Rabbit mAb

Catalog: BS45301

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

This gene encodes one of seven subunits of the human Arp2/3 protein complex. The Arp2/3 protein complex has been implicated in the control of actin polymerization in cells and has been conserved through evolution. The exact role of the protein encoded by this gene, the p16 subunit, has yet to be determined. Alternatively spliced transcript variants encoding different isoforms have been observed for this gene.
