

## Synuclein- $\alpha$ (phospho-Y136) polyclonal antibody

Catalog: BS4642

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

The synuclein family members, including  $\alpha$ -synuclein (also designated NACP for non- $\beta$  Amyloid component) and  $\beta$ -synuclein, are predominantly expressed in the brain and are speculated to be involved in synaptic regulation and neuronal plasticity.  $\alpha$ -synuclein is localized to neuronal cell bodies and synapses.  $\alpha$ -synuclein was first identified as a component of Alzheimer's disease amyloid plaques. Abnormal platelet function in Alzheimer's disease has been demonstrated. During megakaryocytic differentiation  $\alpha$ -synuclein has been found to be upregulated, while  $\beta$ -synuclein is downregulated, indicating that coordinate expression of synucleins may be important during hematopoietic cell differentiation. A mutant form of  $\alpha$ -synuclein has been found in patients with early onset Parkinson's disease.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 18 kDa

### Swiss-Prot:

P37840

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific im-

munogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1:500~1:1000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

p-Synuclein- $\alpha$  (Y136) polyclonal antibody detects endogenous levels of Synuclein- $\alpha$  protein only when phosphorylated at Tyr136.

### DATA:

Western blot (WB) analysis of p-SNCA(Y136) pAb at 1:500 dilution

Lane1: The Brain tissue lysate of Mouse(40ug)

Lane2: The Brain tissue lysate of Rat(40ug)

### Note:

For research use only, not for use in diagnostic procedure.
