

CATSPER1 polyclonal antibody

Catalog: BS60723

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

CatSper is an ion transport protein located on the surface of sperm cells. CatSper (for cation channel of sperm) is vital to cAMP-mediated calcium influx in sperm, sperm motility and fertilization. The gene that encodes CatSper maps to human chromosome 11q12.1. The 686 amino acid protein is a single, six-transmembrane-spanning protein of the voltage- dependent Ca^{2+} channel four-repeat structure and is expressed exclusively in the testis. In CatSper $-/-$ sperm, neither cAMP nor cGMP elicit a significant Ca^{2+} influx in both mutant and wild-type sperm. CatSper is localized to the sperm flagellum and CatSper $-/-$ mice show sluggish and less directed movements. CatSper is required to penetrate the egg, but is not required for egg activation.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 90 kDa

Swiss-Prot:

Q8NEC5

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:2000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

CATSPER1 polyclonal antibody detects endogenous levels of CATSPER1 protein.

DATA:

Western blot (WB) analysis of CATSPER1 polyclonal antibody at 1:1000 dilution

Lane1:A549 whole cell lysate

Lane2:Hela whole cell lysate

Lane3:SP2/0 whole cell lysate

Note:

For research use only, not for use in diagnostic procedure.
