

Rock-2 polyclonal antibody

Catalog: BS7216

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Rho proteins function as molecular switches that are able to turn cytokinesis on and off. Although little is known about signaling downstream of Rho, a host of putative Rho effector proteins have been de-scribed, including rhotekin, citron and the serine/threonine kinase, protein kinase N. Two additional Rho-activated serine/threonine kinases have been described, designated Rock-1 and Rock-2 (also referred to as Roka) for Rho-associated coil-containing protein kinase. Rock-1 and Rock-2 share a structural similarity with myotonic dystrophy kinase.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 160 kDa

Swiss-Prot:

O75116

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:2000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Rock-2 polyclonal antibody detects endogenous levels of Rock-2 protein.

DATA:

Western blot (WB) analysis of Rock-2 pAb at 1:500 dilution

LaneA: The Liver tissue lysate of Mouse(40ug)

LaneB: The Liver tissue lysate of Rat(40ug)

Note:

For research use only, not for use in diagnostic procedure.
