

LHX2 polyclonal antibody

Catalog: BS74607

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

This gene encodes a protein belonging to a large protein family, members of which carry the LIM domain, a unique cysteine-rich zinc-binding domain. The encoded protein may function as a transcriptional regulator. The protein can recapitulate or rescue phenotypes in *Drosophila* caused by a related protein, suggesting conservation of function during evolution.
