TFCP2L1 polyclonal antibody

Catalog: BS74759 Host: Rabbit Reactivity: Human

BackGround:

Transcription factor that facilitates establishment and maintenance of pluripotency in embryonic stem cells (ESCs. With KLF2, acts as the major effector of self-renewal that mediates induction of pluripotency downstream of LIF/STAT3 and Wnt/beta-catenin signaling (By similarity. Required for normal duct development in the salivary gland and kidney (By similarity. Coordinates the development of the kidney collecting ducts intercalated (IC and principal (PC cells, which regulate acid-base and salt-water homeostasis, respectively (By similarity. Regulates the expression of IC genes including subunits B1 and D2 of the V-ATPase complex, OXGR1, CA12, SLC4A1, AQP6 and IC-specific transcription factor FOXI1 (By similarity. Regulates also the expression of JAG1 and subsequent notch signaling in the collecting duct (By similarity. JAG1 initiates notch signaling in PCs but inhibits notch signaling in ICs (By similarity. Acts as transcriptional suppressor that may UBP1-mediated transcriptional activation (By similarity. Modulates the placental expression of CYP11A1.
