ICE2 polyclonal antibody

Catalog: BS75062 Host: Rabbit Reactivity: Mouse

BackGround:

This gene encodes a protein component of the little elongation complex (LEC), which plays a role in small nuclear RNA (snRNA) transcription. The LEC regulates snR-NA transcription by enhancing both RNA Polymerase II occupancy and transcriptional elongation. The encoded protein and other LEC components have been shown to localize to Cajal bodies, which are sites of ribonucleo-protein (RNP) complex assembly. Pseudogenes of this gene have been identified on chromosomes 3 and 4.
