

## TUB polyclonal antibody

Catalog: BS77321

Host: Rabbit

Reactivity: Human, Rat

### BackGround:

This gene encodes a member of the Tubby family of bi-partite transcription factors. The encoded protein may play a role in obesity and sensorineural degradation. The crystal structure has been determined for a similar protein in mouse, and it functions as a membrane-bound transcription regulator that translocates to the nucleus in response to phosphoinositide hydrolysis. Two transcript variants encoding distinct isoforms have been identified for this gene. [provided by RefSeq, Jul 2008]
