

## GPR98 polyclonal antibody

BackGround:Purification&Purity:This gene encodes a member of the G-protein coupled receptor superfamily. The encoded protein contains a 7-transmembrane receptor domain, binds calcium and is expressed in the central nervous system. Mutations in this gene are associated with Usher syndrome 2 and familial febrile seizures. Several alternatively spliced transcripts have been described.Applications: Storage&Stability: Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.Product:Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.Ing/ml in PBS with 0.02% sodium azide, 50% glycerol pH7.2Modification: DATA:Note:DATA:Refer to figuresNote:Swiss-Prot:Note:Q8WXG9For research use only, not for use in diagnostic procedure.	Catalog:	BS78105	Host:	Rabbit	Reactivity: Human
This gene encodes a member of the G-protein coupled receptor superfamily. The encoded protein contains a 7-transmembrane receptor domain, binds calcium and is expressed in the central nervous system. Mutations in this gene are associated with Usher syndrome 2 and familial febrile seizures. Several alternatively spliced transcripts have been described.The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific im- munogen and the purity is > 95% (by SDS-PAGE).Product:WB,1:500 - 1:2000Img/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.Molecular Weight:DATA:Refer to figuresNote:
