

## YAP1 polyclonal antibody

Catalog: BS80134

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

This gene encodes a downstream nuclear effector of the Hippo signaling pathway which is involved in development, growth, repair, and homeostasis. This gene is known to play a role in the development and progression of multiple cancers as a transcriptional regulator of this signaling pathway and may function as a potential target for cancer treatment. Alternative splicing results in multiple transcript variants encoding different isoforms.
