

**ST3GAL4 polyclonal antibody**

Catalog: BS8119

Host: Rabbit

Reactivity: Human, Rat

**BackGround:**

This gene encodes a member of the glycosyltransferase 29 family, a group of enzymes involved in protein glycosylation. The encoded protein is targeted to Golgi membranes but may be proteolytically processed and secreted. The gene product may also be involved in the increased expression of sialyl Lewis X antigen seen in inflammatory responses. Multiple transcript variants encoding different isoforms have been found for this gene.
