

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

CD90 (V88) Peptide

Cat No.: BS9205P

Background

Thy1 is a GPI-anchored, developmentally regulated protein involved in various signaling cascades that mediate neurite outgrowth, T cell activation, tumor suppression, apoptosis, and fibrosis. It is highly expressed on the surface of adult neurons and is thought to play a role in modulating adhesive and migratory events, such as neurite extension. Decreased Thy1 expression is associated with the development of epithelial ovarian cancer, revealing its role as a putative tumor suppressor gene of human ovarian cancer.

Swiss-Prot

P04216

Applications

Blocking

Specificity

This peptide can be used with studies using BS9205 CD90 (V88) pAb.

Purification & Purity

Synthetic peptide CD90 (V88). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term.

Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
