

CD147 Recombinant Protein

Catalog: NCP0177

Host: E.coli

Tag: His-tag

BackGround:

Basigin (EMMPRIN, CD147) is a type I integral membrane receptor protein belonging to the immunoglobulin superfamily. Basigin is a glycosylated protein with four known isoforms, of which isoform 2 is the most abundantly expressed. Multiple functions have been ascribed to Basigin; foremost among these is stimulating the secretion of extracellular matrix metalloproteinases by adjacent fibroblasts, a function which has been implicated in promoting tumor progression. Research studies have shown that Basigin is overexpressed by many tumor cells, and its expression level may correlate with tumor malignancy. A recent study identified the BASIGIN gene as a regulatory target of Slug, suggesting a role for Basigin in the process of epithelial-mesenchymal transition. Basigin has also been identified as a marker for a subset of highly suppressive regulatory T cells, and as an obligate receptor for the malarial parasite *Plasmodium falciparum* on human erythrocytes.

Product:

PBS, 4M Urea, PH7.4

Molecular Weight:

~24kDa

Swiss-Prot:

P35613

Purification&Purity:

Transferred into competent cells and the supernatant was purified by NI column affinity chromatography and the purity is > 85% (by SDS-PAGE).

Restriction Sites:

NdeI-XhoI

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Expression Vector:

pet-22b(+)

DATA:

Note:

For research use only, not for use in diagnostic procedure.

Bioworld Technology, Inc.

Add: 1660 South Highway 100, Suite 500 St. Louis Park,
MN 55416, USA.
